

Flexibility:

Multi-candela, multi-volume, chime/strobes offer the broadest range of audible and visual options. In addition, the TA-2708 can operate on either 12VDC or 24VDC, with no setting required; the device recognizes and self-adjusts to the correct voltage automatically.

Aesthetics:

Selectable volume and candela chime/strobes incorporate the same stylish, low profile design of other Thomas products, for a consistent and aesthetically pleasing appearance across the product line.
